Final Project Mockup

Home / Ask AI

What the user does: types a dish or ingredient, attaches a photo via the camera icon, or browses trending and recent recipes.

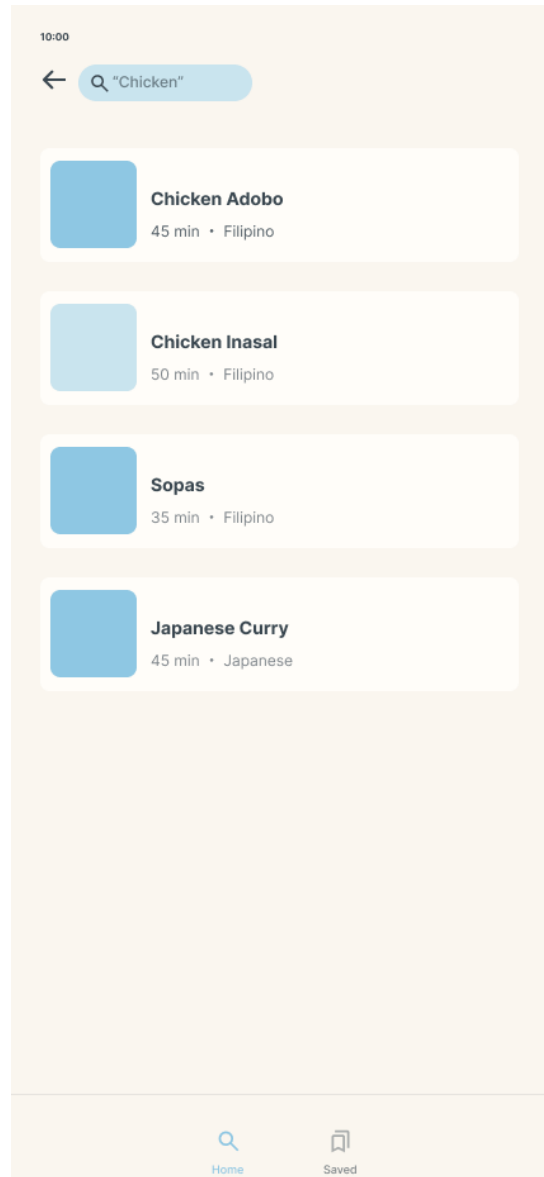

Tappable: composer bar -> Search Results (or straight to Recipe Detail on a confident AI match);
camera icon -> attach photo/link; recipe cards -> Recipe Detail; bottom nav -> Saved.

Search Results

What the user does: scans matches for their typed search, or AI-identified candidates when the match is not confident.

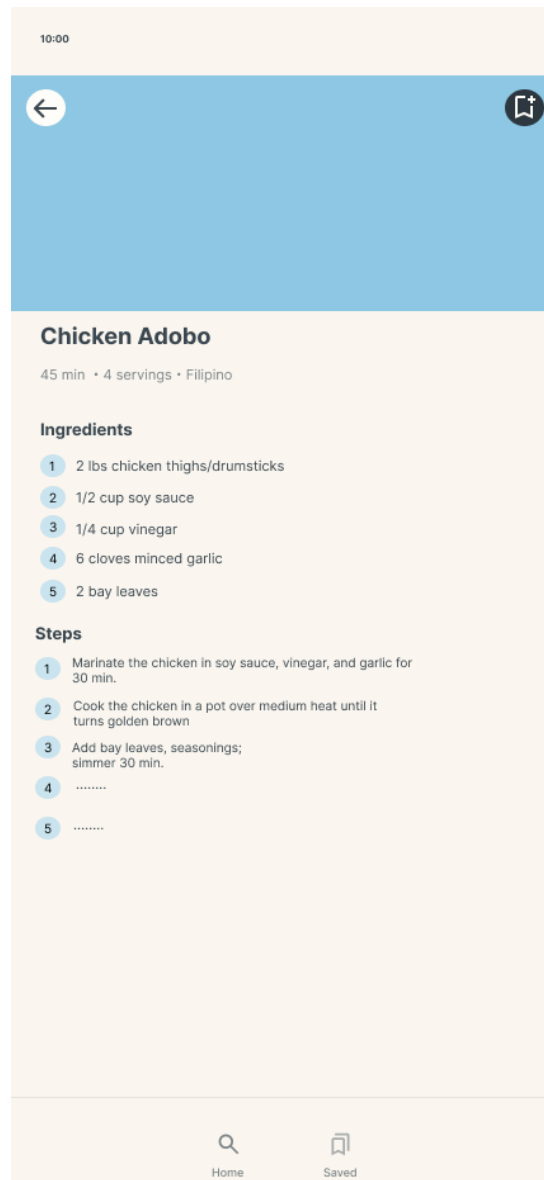

Tappable: back arrow -> Home; recipe cards -> Recipe Detail; bottom nav -> Saved.

Recipe Detail

What the user does: reads the full recipe, ingredients and numbered steps, for the selected dish.

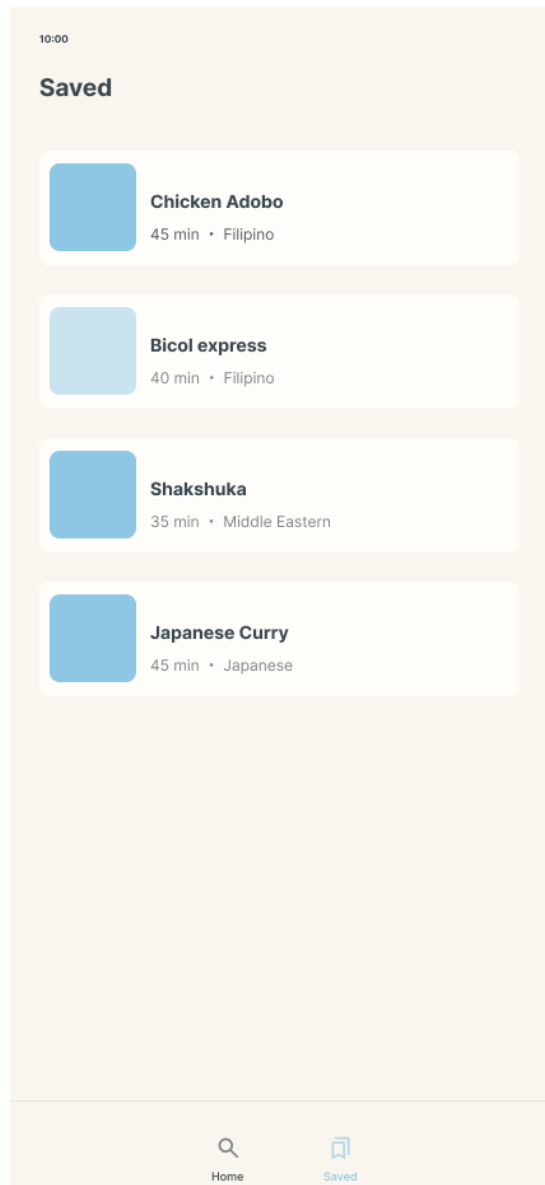

Tappable: back arrow -> previous screen; bookmark icon (top right) -> toggles saved state; bottom nav -> Search or Saved.

Saved Recipes

What the user does: browses recipes they have already saved.

Tappable: recipe cards -> Recipe Detail; bottom nav -> Search.

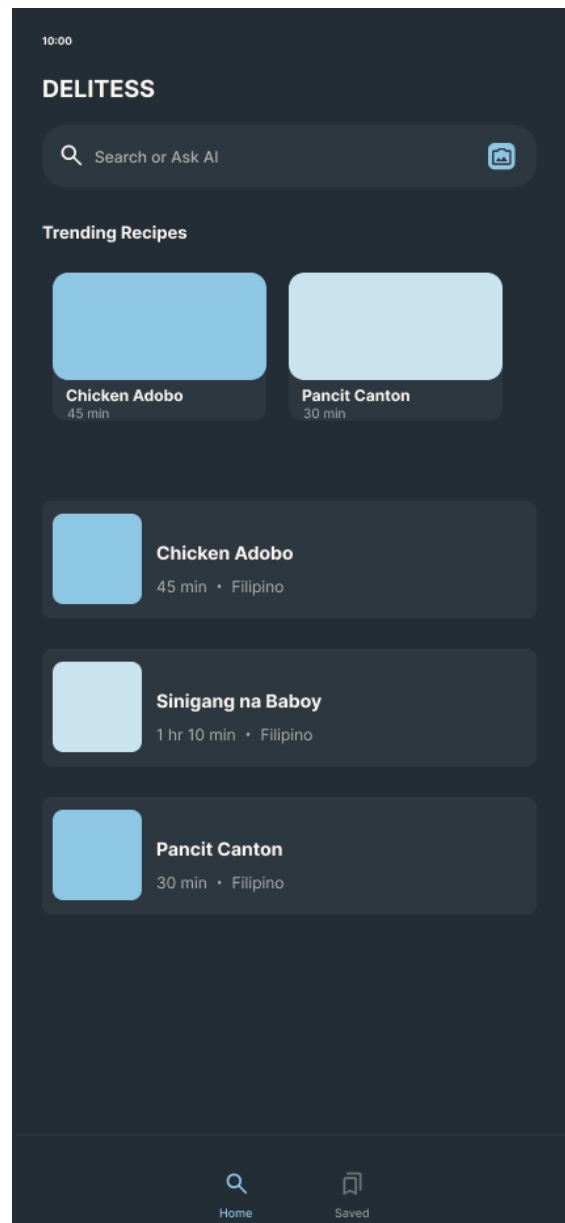

What changed, and why

Screen or element	The wireframe assumed	The mockup shows	What I will change
All screens	One navy text color would work for everything	Prep time and cuisine tags needed a visibly lighter shade to read as secondary, not primary, text; I used navy at reduced opacity as a stand-in since no official token existed for it	Add a text-secondary role to the Design System (Doc 3), not just the single navy value from the prelim
Recipe Detail	Ingredients and steps would fit on one screen without scrolling	This mockup's 5 ingredients and 3 short steps fit with room to spare, but a longer recipe, like Sinigang with more steps, would run past the screen	Plan the ingredients/steps section as scrollable content rather than assuming every recipe is short enough to fit unscrolled

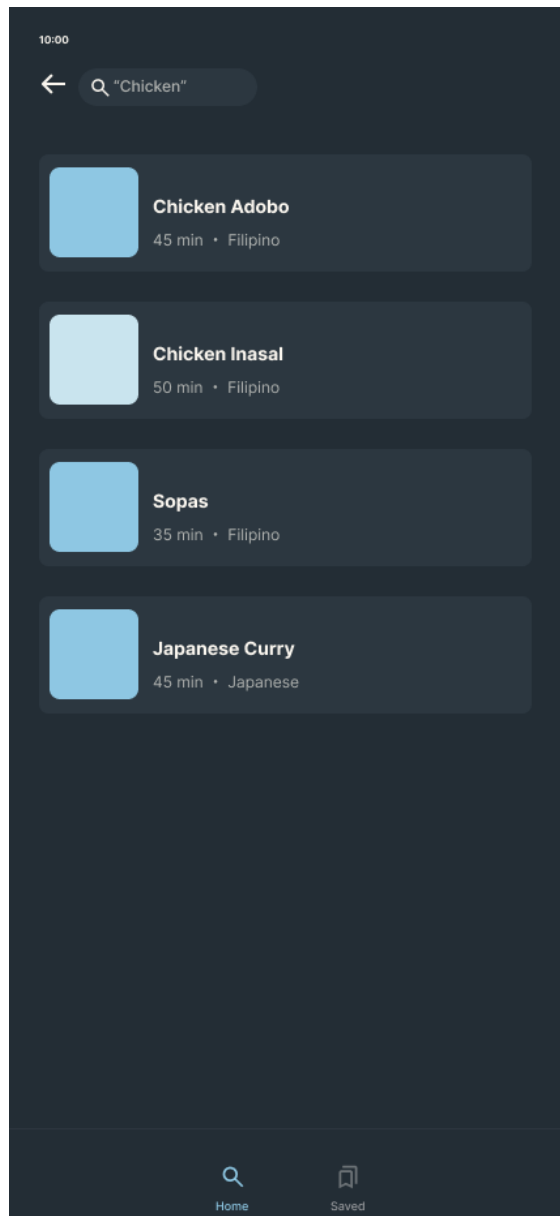

Bonus – Dark mode

Included here because the design system work for this project has already settled on a dark theme, a deepened navy background with cream text rather than full black, and showing it applied to these same four screens confirms the mockup and that decision agree with each other.

Home/ Ask AI – Dark

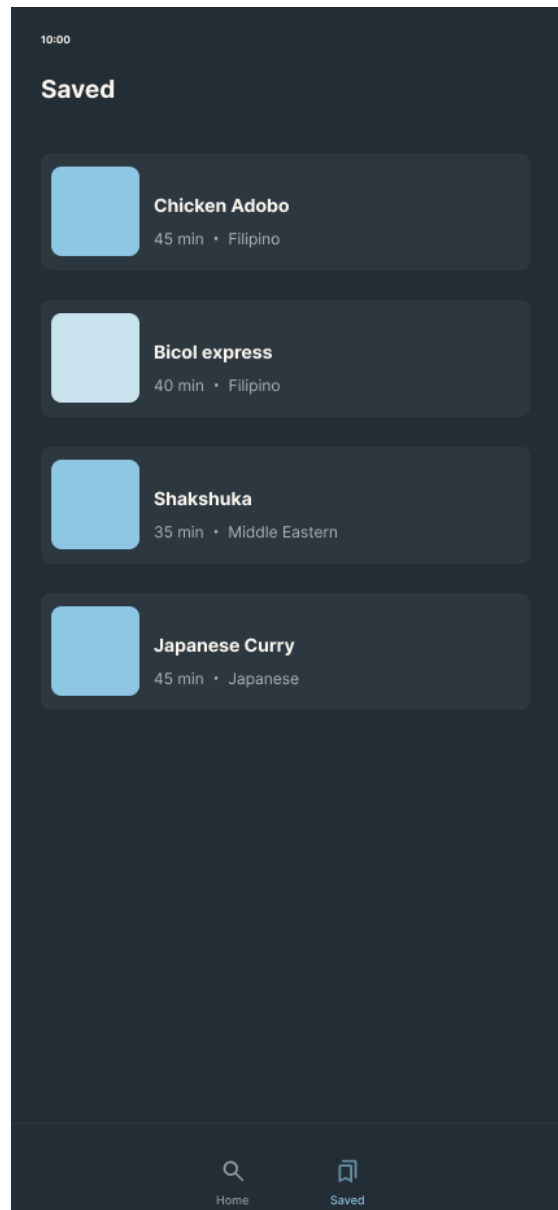

Search Results – Dark

Recipe Details – Dark

Saved Recipes – Dark
